Re: Hauled Sewage Dewatering Trench Site Proposed for Perry Township

We understand that a company Northern Disposal and Sanitation/Katy and Dave McGregor have begun work to develop a Hauled Sewage Dewatering Trench Site with a permit number ECA 19-NOR-97288 on a property located at 878 Highway 592, Lot 22, Concession 5. Emsdale, Onatrio, Perry Township, District of Parry Sound P0A 1J0.

Our concern is as follows,

1. This Hauled Sewage Dewatering Trench Site falls under a defined term as a waste disposal site the Township of Perry Municipal Zoning Plan Consolidated June 2016 and is not a permitted land use application for this area.

2. We are concerned about adverse environment impacts to groundwater and surface water run-off from this site which will adversely affect drinking water for area residents and recreational water quality in Clear lake

Our request is that the Township investigate the zoning permissions on proposed development of a Hauled Sewage Dewatering Trench Site that in such close proximity to residential developments relying on well water for clean drinking water as well as the lake water in Clear Lake used by residents for both drinking and recreational uses.

We also oppose any re-zoning or other amendments that would permit this incompatible development and request notification and access to any documentation regarding this matter. This request is on behalf of all CLPOA Directors and Clear Lake Property owner members.

Yours Sincerely,
Ken Core
